`Java` `GIT` `Flutter` `Dart` `Android` `ADE` `Python` `Docker`

PERSONAL PROJECTS

Smart Sanitization System
- Developed Toilet finder and feedback application as an input for the inference engine along with sensor data and containerized the inference engine and deployed it on Raspberry-Pi chip.

BuyCycle App
- An app for buyers and sellers with privacy settings and object detection for verification. Encrypted chat option has been added for secure communication between buyer and seller. Application has been developed in Native Android as well as Flutter. Translation option is also added to help customers communicate easily.

Travel Buddy App
- An App which gives information about a city including weather and maps. Implemented feature which helps travelers to pack luggage by using QR based Item suggester & packing verifier . It also lets them to add review and save tickets for a trip.

Chat Application
- Implemented a Chat Application with group and one to one chat in Flutter. The messages which are sent are encrypted for security. Profile details and photos support is also provided. Used Fire Storage and Firebase for the Database and Storage Solutions.

Absolute Fitness App
- An App which is being developed for Absolute Fitness Gym Pune in which the user can join the virtual gym and join scheduled classes. It would allow the admin to enroll a new member to the gym. This app has been developed in Flutter. The link for virtual classes which are scheduled will be shared with trainer and attendees.

ACHIEVEMENTS
